

# EMERGENCY GUIDE

## FRACTURED TOOTH

If you have the fractured part, bring it along to your appointment. **Please do not attempt to reattach it yourself. (especially not with superglue)**

## FRACTURED DENTURE

Buy COREGA at your local pharmacy or grocery store to hold the denture in place. **Please DO NOT use super glue or any adhesive to glue it back together.** This might jeopardize the fit of your denture and become a costly consequence.

## CROWN FELL OUT

Use Vaseline to line the crown and push it back into position if possible, this makes a vacuum and will hold the crown in place. **Please DO NOT use super glue or any adhesive to glue it back in.** This might jeopardize the fit of you crown which may become a costly consequence. If you can't get the crown in position, **DO NOT FORCE IT.**

## TOOTH PUNCH OUT

Take the tooth and push it back into position if possible, this makes a vacuum and will hold the tooth in place. If you cant push it back, place it in a holder with milk in. Contact the emergency number.
